

E-Procurement

As before announced in the Industry and Fusion Laboratories Portal, since the 1st of November 2018, all tenders to F4E must be submitted via the [E-submission tool](#).

Having your Company registered in the Industry Portal Partners Database, is not sufficient anymore to submit a tender. In any case, we advise you to [register](#) in the Industry Portal Database in order to:

- Be notified about new Call for Tenders, according to your preferences and Activity Codes
- Receive an email if there are modifications on your Calls of interest
- Submit questions related to a Call for Tender
- Submit a Non Disclosure Agreement related to a Call for Tender
- Ask for a Partnership or take a look to the published announcements.

Once you decide you are interested in a specific Call for Tender, and you want to apply, you must register your company in the [E-submission tool](#) at least 48 hours before the submission deadline of the tender.

For further information, please consult the following tutorials [Supplier registration](#) and [How to submit a tender?](#)

Other aspects of the bidding process are unchanged. For further information on how to prepare a tender, please consult our tutorial on [How to prepare a tender for F4E?](#)

Consult the [Guidance on supporting documentation for Exclusion Criteria](#) for further information on the documents you are asked to submit in order to prove that your company is in compliance with points of Article 136 (1) GFR.
