

Pathway to the Eu Fusion Business Association

June 26, 2024 | Hybrid format

CONTEXT

The nuclear fusion landscape in Europe is undergoing a transformative phase, driven by significant changes in the European fusion roadmap. These changes reflect the European Commission's commitment to increasing industry representation and involvement in the field.

The Commission is advocating for greater collaboration between established companies and new emerging players, aiming to accelerate technological advancements and the commercialization of fusion energy. This collaborative approach seeks to strengthen Europe's leadership in the global fusion energy race, ensuring that all the stakeholders in the sector work together within a robust and coordinated framework.

OBJECTIVE

The objective of this meeting is discuss about the role and representation of the European industry in the future European fusion framework, through the set-up of an Association open, led by the industry and in close collaboration with all the fusion landscape stakeholders
