Partnership opportunities

Fields marked with * are mandatory.

Are you looking for partner to fulfill the requirements of current or forthcoming F4E business opportunity?
Do you have relevant expertise, technologies, or interesting raw materials to offer?
Or do you simply want to introduce your company and engage in the EU Fusion Industry Supply Chain?

Whether you are a large corporation, an SME, an established fusion player or a newcomer to the field, this is your starting point.

In just a few minutes, you can submit an offer or request below. Our Market Analysis team will review your submission and feature it in the Fusion Partnerships section of the F4E Industry Portal.

Thank you for joining us and contributing to the future of fusion!

F4E Market Analysis and Techno Transfer Group

*** Description (Please describe what you are offering / looking for. If related to a specific Call for Tender or Business Opportunity with F4E or ITER IO please indicate the name and reference)**

QUANTIA is a technology consultancy based in Spain, specialising in data governance, RAMI engineering and digital solutions for fusion and other big science facilities. We combine expertise in reliability, availability, maintainability and inspectability with digital twin and reality capture technologies to support informed decisions throughout the asset life cycle. Our proprietary RAMI software is interoperable with enterprise asset management (EAM) systems, connecting engineering analyses with operational and maintenance information. Through close collaboration with IFMIF-DONES in defining its Maintenance Programme, we bring practical experience of complex research infrastructures. QUANTIA helps clients integrate data, engineering and maintenance to improve asset performance, strengthen operational readiness and optimise life-cycle value.

*** What form of collaboration would you like to promote?**

- (●) Offer - my organisation has relevant expertise, technologies, or raw materials to offer
- ( ) Request - we are looking for specific expertise, technologies, or raw materials
