

Partnership opportunities

Fields marked with * are mandatory.

Are you looking for partner to fulfill the requirements of current or forthcoming [F4E business opportunity](#)?

Do you have relevant expertise, technologies, or interesting raw materials to offer?

Or do you simply want to introduce your company and engage in the EU Fusion Industry Supply Chain?

Whether you are a large corporation, an SME, an established fusion player or a newcomer to the field, this is your starting point.

In just a few minutes, you can submit an offer or request below. Our Market Analysis team will review your submission and feature it in the [Fusion Partnerships section](#) of the F4E Industry Portal.

Thank you for joining us and contributing to the future of fusion!

*** Description (Please describe what you are offering / looking for. If related to a specific Call for Tender or Business Opportunity with F4E or ITER IO please indicate the name**

and reference)

METAL PRODUCTS AND COMPONENTS FOR YOUR ITER PROJECTS – Bimo Tech

Bimo Tech specializes in the manufacturing and supply of high-performance metal components and semi-finished products for ITER and fusion energy projects.

We offer materials that meet the highest industry standards, including:

316LN-IG stainless steel
Titanium and titanium alloys
Nickel alloys
Copper and copper alloys
Aluminum
Tungsten, molybdenum, tantalum
Other high-performance metals

We provide a wide range of semi-finished products, including:

Plates, sheets, and strips
Forgings and castings
Tubes and pipes
Wires, rods, and bars
Custom-machined components

Additionally, Bimo Tech offers precision machining, coating and testing services to ensure that all materials and components meet the stringent requirements of ITER and nuclear fusion applications.

Contact us today to discuss your ITER project requirements and let us provide you with the highest-quality metal solutions.
