

Partnership opportunities

Fields marked with * are mandatory.

Are you looking for partner to fulfill the requirements of current or forthcoming [F4E business opportunity](#)?

Do you have relevant expertise, technologies, or interesting raw materials to offer?

Or do you simply want to introduce your company and engage in the EU Fusion Industry Supply Chain?

Whether you are a large corporation, an SME, an established fusion player or a newcomer to the field, this is your starting point.

In just a few minutes, you can submit an offer or request below. Our Market Analysis team will review your submission and feature it in the [Fusion Partnerships section](#) of the F4E Industry Portal.

Thank you for joining us and contributing to the future of fusion!

F4E Market Analysis and Techno Transfer Group

*** Description (Please describe what you are offering / looking for. If related to a specific Call for Tender or Business Opportunity with F4E or ITER IO please indicate the name and reference)**

Bandak AS was established in Kongsberg in 1938 and moved to Lunde in 1963. Bandak has since developed into a high-technology company with a highly skilled workforce that takes pride in meeting customer's needs. The company has approximately 80 employees.

Complex details and system deliveries are supplied worldwide from modern and well-equipped production premises measuring 12,000 m². The business has a fully equipped workshop for turning, milling and grinding, together with a well-developed inspection, assembly, flushing and testing department. In addition to its own welding department with plasma welding, the company also has a large surface department, which supplies thermal coating. A modern ERP system and CAD/CAM systems are used to plan and control the overall operation.

The bulk of the products supplied by the company are supplied to the Oil & Gas industry, but it is also a much-valued supplier of highly complex products for the maritime-, defence- and general/onshore industries.

Bandak is, for many, synonymous with Taut Wire. A product developed and produced in Lunde and which can be found in all of the world's oceans. The Taut Wire from Bandak ensures that vessels maintain their exact position, e.g. diver support vessels, cable laying vessels and supply ships.

All of Bandak's employees focus on 5S and continuous improvements in their everyday work.
