

Partnership opportunities

Fields marked with \* are mandatory.

Are you looking for partner to fulfill the requirements of current or forthcoming [F4E business opportunity](#)?

Do you have relevant expertise, technologies, or interesting raw materials to offer?

Or do you simply want to introduce your company and engage in the EU Fusion Industry Supply Chain?

Whether you are a large corporation, an SME, an established fusion player or a newcomer to the field, this is your starting point.

In just a few minutes, you can submit an offer or request below. Our Market Analysis team will review your submission and feature it in the [Fusion Partnerships section](#) of the F4E Industry Portal.

Thank you for joining us and contributing to the future of fusion!

**F4E Market Analysis and Techno Transfer Group**

**\* Description (Please describe what you are offering / looking for. If related to a specific Call for Tender or Business Opportunity with F4E or ITER IO please indicate the name and reference)**

ULMA Forged Solutions (ULMA Forja) is a company specialized in the design and manufacture of high-performance forged components for critical industrial applications. With more than 50 years of experience in the forging industry, the company provides integrated solutions covering engineering, material selection, forging, heat treatment, machining and quality control.

ULMA Forja produces high-integrity steel and special alloy components designed to operate under extreme conditions such as high loads, pressures and temperatures. Its products are widely used in demanding sectors including energy generation (nuclear, fusion, renewables), oil & gas, industrial equipment and heavy machinery.

We combine advanced manufacturing technologies with strong engineering capabilities to deliver customized components that meet the most stringent international standards for safety, reliability and traceability. ULMA Forja is part of the ULMA Group, a leading industrial cooperative based in Spain, and operates with a strong commitment to innovation, sustainability and long-term collaboration with strategic partners in large-scale scientific and energy projects.
